Euploea tulliolus ledereri

Male upperside

Male underside

C & R Felder 1860 - The Dwarf Crow

Koh samui and Koh Pha Ngan.

Much the smallest of the Euploea genus to be found in Thailand.

This is commonly seen in and around forests. Although it is found in Taiwan, it is near the northernmost limit of its range on Mainland Asia.

Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
x	x	x	x	x	x	x	x	x	x	x	x

Wingspan

60 - 70mm

Early Stages

Known. More detailed life history information is available from the following resources: S. Igarishi - Life Histories of Asian Butterflies, Volume.1 , Page 320.

Larval Foodplant

Mikania cordata (Compositae)

Range

S. Burma and S. Thailand, Cambodia and S. Vietnam down through the Peninsular, Borneo through the Archipelago to New Guinea, Australia and the Pacific Islands. An isolated population is on Taiwan.
