Arhopala alaconia media

[<< Back to Lycaenidae overview](#)

Evans 1957 - The Patchy Oakblue

This species was first found on the Islands in September 2012. Remarkably only 4 days separated the first specimen from Samui with that on Koh Phagnan. A relatively small species with a distinctive triangular mark in spaces 6 & 7 on the underside hindwing.

It can be found at the edges of and inside woodland.

Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
								x	x		

Wingspan

30 - 34mm

Early Stages

Not known.

Larval Foodplant

Not known.

Range

S. Myanmar through Peninsular Thailand to West Malaysia.
