Ypthima baldus newboldi

Upperside

Underside

Distant 1882 - Common Fivering

Koh Samui and Koh Pha Ngan

A very common species of meadows and secondary growth.

There is still much confusion as to which members of the *baldus* subgroup comprise merely subspecies or are species in themselves.

Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
x	x	x	x	x	x	x	x	x	x	x	x

Wingspan

30 - 40mm

Early Stages

Partially known.

Larval Foodplant

Pogonatherum crinitum (Gramineae)

Range

Peninsular Thailand and West Malaysia. Other related species/subspecies found from India to China as well as Sumatra, Borneo, Javand the Lesser Sunda Islands.
