Neptis omeroda omeroda

[<< Back to Nymphalinae overview](#)

Moore 1875 - The Dingy Sailor

This species has, so far, only been found on Koh Pha Ngan.

The species is very similar to *Neptis harita*, however can be distinguished by the upperside hindwing marginal line being continuous in this species, whereas it is more of a chain in *N. harita*.

Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
						x	x				

Wingspan

50 - 60mm

Early Stages

Not known

Larval Foodplant

Not known

Range

Peninsular Thailand, Malay Peninsular, Sumatra, Borneo & Java. Another subspecies is found on the islands off the west coast of Sumatra (Paramalaya).
