Upperside

### Moore 1858 - The Dot-dash Sergeant

Koh Samui only.

This species was found in some numbers by Masashi Maruyama in 2000. However, no sign of it has been made since my arrival in 2007. This may well be owing to its similarity, in flight, to other members of this Genus.

### Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
				x							

### Wingspan

45 - 60mm.

### Early Stages

Fully known. More detailed life history information is available from the following resource: [ButterflyCircle Blog](#) (courtesy of Dr. Horace Tan.)

### Larval Foodplant

*Uncaria* spp. (Rubiaceae)

### Range

From India, down through Myanmar, Peninsular Thailand, West Malaysia to Singapore.
