## Euthalia adonia beata

Male upperside

Male underside

### Fruhstorfer 1905 - The White-Banded Red Baron

Koh Samui and Koh Pha Ngan.

This species is only encountered infrequently, at the edges of woodland. The female is easily distinguished by the white band on the hindwing, which no other member of this Genus on the Islands have.

### Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
	x			x	x	x		x	x		x

### Wingspan

50 - 60mm

### Early Stages

Fully known. More detailed life history information is available from the following resource: [ButterflyCircle Blog](#) (courtesy of Dr. Horace Tan.)

### Larval Foodplant

*Scurrula parasitica* (Loranthaceae)

### Range

Peninsular Thailand and Langkawi Island (Malaysia). Other subspecies on mainland Malaysia, Sundaland, Lesser Sunda Islands and the Philippines.

Female upperside

Female underside
