Papilio nephelus annulus

[<< Back to Papilionidae overview](#)

Pendlebury 1936 - The Black and White Helen

This species was found by Masashi Maruyama along the Maenam-Lamai road on 3 February 2015. I have not seen it since my arrival in 2007, though that may be due to its superficial likeness to the common *Papilio helenus*.

Flight Period

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
	x										

Wingspan

100 - 125mm.

Early Stages

Not fully known.

Larval Foodplant

Many species of Rutaceae

Range

Peninsular Thailand, Langkawi Island and north Malaysia. Other subspecies can be found in the very south of Peninsular Thailand, West Malaysia and Singapore and the Ranong area and Andaman Islands and the rest of Sundaland.
